
Workshop on “AI for Verifiable Coding” (VERICODEGEN)

NeurIPS 2026, Atlanta, Georgia, USA · December 12 or 13, 2026

Call for Sponsorships

Overview

Everyone says vibe coding is ready for real software. But would you ship code whose correctness has never been verified? Would you live with code that is not maintainable?

VERICODEGEN is a full-day NeurIPS 2026 workshop on **verifiable code generation**: human-aligned agents collaborating with proof assistants, model checkers, SAT/SMT solvers, and static analyzers to co-design specifications, code, proofs, and heuristics that carry machine-checkable guarantees. Topics include neuro-symbolic AI, autoformalization, LLM-guided proof search, verified refactoring, training signals drawn from compiler and theorem-prover feedback, and evaluation protocols that track end-to-end guarantees rather than pass@k.

Organizers span Amazon Web Services, Korea University, Microsoft, MIT, Simon Fraser University, UC Berkeley, University of Oxford, and USC.

Confirmed Speakers and Panelists (A–Z by last name)

Leonardo de Moura	Amazon Web Services	Baishakhi Ray	Columbia University
Emily First	Rutgers University	Bartley Richardson	CrowdStrike
Vijay Ganesh	Georgia Tech	Shubho Sengupta	Axiom Math
Patrick Li	Harmonic	Patrick Shafto	DARPA and Rutgers University
Shan Lu	University of Chicago	Dawn Song	UC Berkeley

At a Glance

Format	Full-day workshop plus a private dinner for organizers, speakers, and awardees
Audience	200+ attendees expected
Program	9 invited talks and a panel discussion
Tracks	Two: (1) research papers and (2) competition
Venue	Georgia World Congress Center, Atlanta

Why Sponsor AI for Verifiable Coding?

- **Reach an audience that is hard to reach anywhere else.** Researchers working across machine learning and formal methods are spread thin over many venues; this workshop concentrates them in one room for a day.
- **Recruit scarce talent.** Few people are fluent in both proof assistants and modern model training. Gold sponsors can arrange a recruiting lunch, and every tier reaches accepted-paper authors by email.
- **Help set how verified coding gets measured.** The field has no agreed protocol for end-to-end guarantees. Gold sponsors give a talk and sit on the industry panel.
- **Support the work directly.** Sponsorship funds competition prizes, student travel grants, and the community events that make the day worth attending.

Competition Track: Lean Proof Refactoring

Frontier models write proofs that compile, but real projects live with proofs for years, and refactoring is multi-objective: proof length, compilation cost, and cross-version compatibility, and their trade-offs are largely ignored. This competition is a joint effort with Amazon, UT Austin, and popular Lean repos such as CSLib, Physlib, ArkLib. Winners receive cash prizes and contribute to those repositories.

Sponsorship Tiers

All amounts are in US dollars. Packages can be tailored on request.

	Gold \$10,000	Silver \$5,000	Bronze \$2,500
Official recognition during opening remarks	✓	✓	✓
Logo on the workshop website	✓	✓	✓
Sponsored emails to all accepted-paper authors	3	2	1
Roll-up stand displayed at the workshop	✓	✓	
One-minute promotional video shown during the workshop	✓	✓	
Five-minute talk at the workshop	✓		
Seat on the industry panel	✓		
Recruiting lunch with attendees (<i>catering costs passed on to the sponsor</i>)	✓		
Named sponsor of the competition prize pool (<i>acknowledged on the leaderboard site, in the award announcement, and from the podium</i>)	✓		

Planned Use of Funds

Item	Amount	Notes
Competition prizes	\$8,000	Awards across the competition leaderboard
Travel grants	\$8,000	8 grants of \$1,000 each for students and early-career researchers
Poster and break catering	\$4,000	Refreshments to keep discussion going between sessions
Private dinner	\$4,000	Organizers, speakers, awardees, and invited researchers
Website and materials	\$1,000	Roll-up printing, signage, leaderboard hosting
Estimated total	\$25,000	Plus minimal administrative overhead

The target is met by, for example, one Gold, two Silver, and two Bronze sponsors. Funds will be managed transparently; anything unspent goes to additional travel grants.

Dates

Milestone	Date (anywhere on earth, AoE)
Paper abstract deadline	2026-09-11
Paper deadline	2026-09-13
Paper decisions to authors	2026-09-29
Paper camera-ready	2026-10-14
Competition warm-up test	before 2026-09-30
Competition final submission	2026-10-01~11-08
Competition winner announcement	2026-11-22
Sponsorship commitment	2026-10-01, to appear in printed and web materials
Workshop	2026-12-12 or 13, Atlanta, Georgia, USA
